NAGESH KUMAR P C S

+91 8095333633

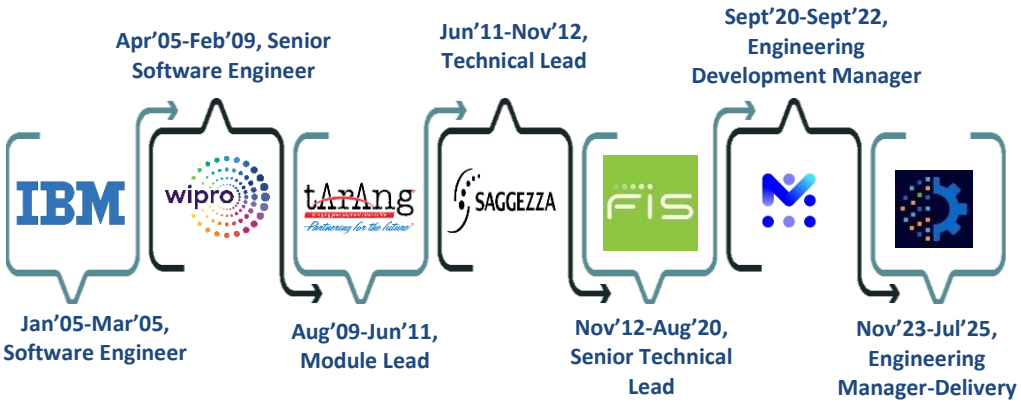
nageshkumar2001@yahoo.com

Aspiring to drive technology innovation and operational excellence as an Engineering Manager, leveraging over 20 years of experience in software development, cloud solutions, and team leadership to deliver scalable, high-impact solutions aligned with business goals.

PROFILE SUMMARY

- **Seasoned IT Leader:** Experience driving end-to-end software development and delivery for global clients across Finance, Automotive, Telecom, e-commerce and e-Publishing domains, ensuring business-critical outcomes.
- **Strategic Project Leadership:** Directed complex, multi-million-dollar projects with cross-functional teams, implementing best practices in SDLC, Agile Scrum, and CI/CD to optimize delivery timelines and quality standards.
- **AI & Emerging Tech Proficiency:** Strategic expertise in leveraging advanced AI tools such as ChatGPT, Google Gemini, and GitHub Copilot to accelerate innovation, enhance productivity, and drive data-driven decision-making across business and technology functions.
- **Stakeholder & Client Management:** Collaborated effectively with senior management, product owners, and global clients to translate business requirements into technical solutions, enhancing customer satisfaction and project success.
- **Process & Quality Optimization:** Established standards for coding, design, and documentation, ensuring maintainable, secure, and high-quality software while mitigating risks and improving operational efficiency.
- **Innovation & Value Delivery:** Championed product improvements and customer-centric enhancements, integrating advanced features and feedback-driven solutions that improved adoption, performance, and overall ROI**.**

CAREER TIMELINE



ACHIEVEMENTS

- Awarded **"Thanks A Zillion"** for excellent commitment in delivering XMLCWS enhancement as part of the SISCO Replacement project.
- Awarded **"Feather in Cap"** for contribution to XML Charging Web Service project (Client: Dun & Bradstreet), ensuring bug-free deliverables on time despite challenges.
- Awarded **"Feather in Cap"** for dedication and successful completion of a complex order recovery for all EOS & Non-EOS markets, helping recover revenue for D&B.
- Gained international experience through **H1B Visa** (May 2007 – May 2010) serving Wipro's U.S. clients: Capital One, Hartford Insurance, and GMAC Insurance.
- Conducted **business travel to Tokyo** for Wipro's client Lehman Brothers, gaining exposure to international financial processes.

CORE COMPETENCIES

- Software Development Life Cycle (SDLC)
- Agile and Scrum Methodologies
- Project Management and Delivery
- Quality Assurance and Testing
- Risk Management and Mitigation
- Java Development and Design Patterns
- Microservices Architecture
- Version Control Systems
- Performance Tuning and Optimization
- Resource Allocation, Task Assignment, KPI/KRA Setting
- Gap Analysis, Functional & Technical Specification Preparation
- CI/CD Pipeline Implementation
- SOW & SLA Management, Stakeholder Management

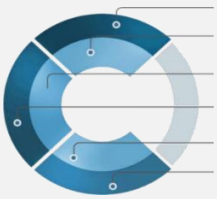
CERTIFICATIONS

- **AWS Certified Solutions Architect - Pursuing**
- **Certified Scrum Master (CSM)**
- **Sun Certified Java Programmer (SCJP)**

EDUCATION

Bachelor of Engineering (Electronics & Communication Engineering) | Institution of Engineers of India (IEI), Kolkata

SOFT SKILLS



Progressive Leadership
Effective Communication
Change Agent
Problem-solving
Result-oriented
Analytical Thinking

PROJECTS UNDERTAKEN

Modern DMS Vehicle – Inventory | *CDK Global* | Nov 2023 – Jul'25
Role: Engineering Manager | **Technologies:** React, Typescript, AWS, Microservices, RabbitMQ, Postgres, Java, OAuth2, JSON, GIT, Bitbucket, Sonar, New Relic

- Led team on architecture, design, implementation, validation, and monitoring of a dealer management system integrating AI for sales analytics.
- Set coding standards, improved software quality, and reduced vulnerabilities.
- Planned backlog, allocated tasks, mitigated risks, and mentored the team to enhance performance and collaboration.

MFS – Macalla Platform Financial Services | *STC Kuwait, Jawwal Palestine, STC Ooredoo, Permanent TSB* | Sep 2020 – Aug 2022
Role: Engineering Development Manager | **Technologies:** Java, Spring Boot, Microservices, REST, Hibernate, Jenkins, Docker, Kubernetes, Oracle, SQL, SVN, GIT, Linux

- Managed end-to-end product delivery for mobile payments and e-commerce platform supporting multi-currency and multi-lingual operations.
- Monitored design, code quality, and CI/CD processes; mentored team and conducted code reviews.
- Defined migration strategy for microservices architecture and ensured secure coding and data handling.

ACBS WebLink | *Mizuho, IFC, SCB, Capital One, UMPQUA, BOK* | Nov 2012 – Aug 2020
Role: Sr. Technical Lead | **Technologies:** Java, Spring, Spring Boot, Microservices, REST, Hibernate, JBOSS, SQL, Oracle, SVN, Windows, Linux

- Led SDLC activities including design, architecture discussions, code reviews, and performance optimizations.
- Mentored and guided team to resolve technical issues and ensured timely delivery with high-quality standards.

Mahindra & Mahindra Financial Services Limited (MMFSL) | *Mahindra & Mahindra* | Feb 2012 – Aug 2012
Role: Technical Lead | **Technologies:** Java, Servlets, JMS, IBM MQ, JSP, Struts, Ajax, Oracle WebLogic, JUnit, SVN

- Led team, assigned tasks, reviewed code, and resolved critical issues; established baseline frameworks for development and unit testing.

RRD – Libre Digital | *RRD – Libre Digital* | Aug 2011 – Feb 2012
Role: Technical Lead | **Technologies:** Java, Servlets, JSP, JBOSS, EJB, Oracle, JAX-WS, JMS, Hibernate, Apache Wicket, SVN

- Mentored team, reviewed code and deliverables, and resolved technical and environment issues.

CSPi (Corporate Service Platform International) | *FADV Corporation* | Feb 2012 – Aug 2012
Role: Module Lead & Senior Developer | **Technologies:** Java, Struts, JSP, Spring, Hibernate, Web Services, J2EE, JBOSS, Oracle

- Led module development, conducted code reviews, resolved critical technical issues, and ensured timely delivery of background verification solutions.

Charity Affinity Portal | *Capital One* | Mar 2009 – Jun 2009
Role: Senior Project Engineer | **Technologies:** Java, Web Services, AXIS, JDBC, Oracle, SSL, HTML, JavaScript

- Designed and developed web services for affinity-based credit card portal; integrated with NFG system and implemented SSL POC.

CTS UI Services | *GMAC Insurance* | Jan 2008 – Jun 2008
Role: Onsite Coordinator | **Technologies:** Java, Eclipse, JUnit, JMS, EJB, J2EE, JBoss, JSP, MQ Series, WSDL, DB2, Oracle

- Coordinated client communication, provided knowledge transfer, assisted offshore team, and conducted code reviews for insurance policy management system.

POLK Documentation | *Hartford Insurance* | Dec 2007
Role: Senior Project Engineer | **Technologies:** Java, MS Word, Windows XP

- Documented enhancements and elaborated functionality of integrated mainframe and Java modules.

AARP Membership | *Hartford Insurance* | Jul 2007 – Nov 2007
Role: Senior Project Engineer | **Technologies:** Java, JUnit, JSP, Struts, WebLogic, Oracle

- Developed integration services, processed membership inquiries, renewals, and enrollments.

Partner Compensation RTB | *Dun & Bradstreet* | Duration not specified
Role: Programmer Analyst | **Technologies:** Java, Web Services, AXIS, Servlets, JSP, JDBC, Tomcat, Oracle, Sybase, JUnit, VSS

- Handled production issues, code fixes, and month-end/year-end processing; performed root cause analysis and performance optimization.

SmartTrust DP7 / SIM Services | Telecom | Jul 2005 – Sep 2005
Role: Project Engineer | **Technologies:** Java, Oracle, JBuilder, JUnit

- Developed APIs for SIM, subscriber, terminal, and subscription management modules.

SESC Regulatory Inspection Reporting | *Lehman Brothers, Japan* | Apr 2005 – Jul 2005
Role: Project Engineer | **Technologies:** Sybase IQ

- Conducted GAP analysis, prepared technical specification documents, and supported audit reporting.

Common Commerce Engine | *IBM Global Systems* | Jan 2005 – Apr 2005
Role: Project Engineer | **Technologies:** Java, DB2, WebSphere

- Analyzed data repository consistency, implemented redundancy checks, and ensured suitability for internal monetary transaction control.

TECHNICAL SKILLS

- **Languages:** Java, SQL, JavaScript
- **Cloud:** AWS Cloud
- **Web & E-Commerce Technologies:** Microservices, Spring Boot, REST API, JSON, JSP, Servlets, SOAP, WSDL, REST, J2EE, Spring, Hibernate, Struts, EJB, XML, PL/SQL
- **Databases:** Oracle, MySQL
- **DevOps / CI-CD / Tools:** Jenkins, GIT, SVN, Docker, Kubernetes, SonarQube, FindBugs, CheckStyle, JUnit, JNDI, AXIS, Eclipse, Bitbucket
- **Web/Application Servers:** JBoss (WildFly), Tomcat, Oracle WebLogic, Covalent Tomcat
- **Messaging / Integration:** JMS, Rabbit MQ, KAFKA, Message brokers
- **Other Skills:** Performance Tuning, Unit Testing, CI/CD Pipeline Management, Microservices Architecture Implementation, Support React Or Typescript Projects, Non-Functional Requirements(Security, Performance, Usability And Scalability) Management To Meet User Expectations

PERSONAL DETAILS

Languages Known: English, Hindi & Telugu
Address: Neredmet, Hyderabad
