Venu | Agentic AI | Engineering Head - AI Architect | Ex ORACLE, GAP INC, Bank of America

E-mail: venusm2022@gmail.com | Contact: 7680840770 | Hyderabad | venugajendrula

Product Modernization & Digital Transformation

Seasoned Global Engineering Leader - AI with 21+ years of delivering enterprise-wide business outcomes through strategic application of technology, innovation, and engineering leadership.

PROFILE SUMMARY

Core Competencies: Technology Roadmap | **AI Strategy** | **Digital Transformation** Leadership | **P&L Management** | **Product Engineering** | **Cloud Modernization** | **GenAI, Vertex AI & Agentic AI** | **Data & Analytics** | **Agile/SAFe** Leadership | CXO & GTM Leaders Stakeholder Management | Change Management | **Collaborative Leadership** | Team Empowerment | Continuous Improvement Mindset | **Innovation Culture** | **GCC**

- **Global Engineering Leader** leading **250 + FTEs and $50M portfolios** across **US, Europe, APAC,** and **Middle East.**
- **Strong Background in building Large offshore teams and leading** the skilled **Engineering Manager, Product Managers**, **Data Engineers** & Data Scientists, Solution Architects, UI, UX & QA.
- Expertise in **MACH architecture**: Microservices, API-first, Cloud-native, Headless systems.
- Expertise in defining and driving **KPIs, OKRs, budget management, P&L** ownership, and estimation models to ensure financial and **Operational Excellence**.
- Delivered **Enterprise modernization programs** improving **engineering velocity by 30%** and driving multi-region cost efficiency.
- Skilled in **defining technology roadmaps and executing digital transformation** initiatives through AI-driven innovation and data-centric architectures.
- Delivered **AI-driven modernization initiatives** result in measurable business outcomes across global portfolios.
- Expert in **drafting and obtaining sign-off** on **Statements of Work (SOW)** with customers.
- **Strong Hands** on with **Java, Spring Boot, Microservices**, **Python**, **Design patterns.**
- Proven success in **Designing, Architecting & developing World-Class Enterprise Production grade** solutions across **Life Sciences, Fintech, Banking, Financial, Insurance, Payment, Capital Markets, Stock Exchange, FX, E-Commerce, Health Care, Life Sciences, Biopharmaceutical,** Apparel, **Automotive** domains.
- End-to-End ownership of complex global **ADMS** engagements.
- Expertise in **Designing** and implementing **AI/ML solutions** leveraging **NLP**, Reinforcement Learning and RAG (**TensorFlow, Hugging Face** and **PyTorch).**
- Developed **LLM-powered Agentic AI,** applications using Vertext AI, **LangChain, LangGraph**, and **Crew AI** frameworks to enable autonomous, goal-driven agent interactions.
- Production experience with MCP ecosystems and A2A Orchestration.
- MLOps and observability tooling: LangSmith, MLFlow, PromptFlow & OpenTelemetry
- **Led** the **Design** and **Development of a Predictive Residual Modeling Agentic AI** system to enhance decision-making and cost efficiency in **Heavy Truck Lease Management**.
- **Expertise** in **Data Engineering** through **Azure Data Factory, Databricks, & PySpark.**
- Expertise in **Metadata Management, Data Governance**, Data Quality, Data Lineage.
- Executed **E2E Product delivery from inception to Launch** with Software Security best practices & Protocols.
- Expertise in **Agile and Lean practices (Scrum, TDD and BDD. Six Sigma & SWOT).**
- Engaged in **pre-sales** strategy, demo execution, and technology pitches to global clients.

LEADERSHIP & STRATEGIC COMPETENCIES:

- **Product & Engineering**
- AI-Driven Engineering Leadership
- **OKR & KPI Definition and Governance**
- **P&L Ownership**
- **Agile/SAFe Leadership**
- Engineering & Operational Excellence
- **CXO Stakeholder** Management
- Stakeholder Engagement & Governance.
- Operational Resilience.
- Customer Experience (CX).

KEY ACHIEVEMENTS:

- **Saved $2 Million/Annum** for the **Automation tool** developed for **Mainframe** apps. **Patent** filed.
- **Gold award** for Max No of Tools developed/Annum
- **Saved $0.5 Million/Annum** for the **Visa** Product.

ARCHITECTURE:

- Microservices (**Spring Boot/Spring Cloud**).
- Multi-Tenant **SaaS.**
- Serverless and **Event-Driven** (**Kafka/SNS/SQS**).

CERTIFICATION & TRAININGS:

- PMP
- AWS Cloud Solution Associate Architect
- Lean Six Sigma
- SAFE Agilist 4.0

PROFESSIONAL EXPERIENCE

CDK Global Automotive Modernization & Digital Transformation | TAO Digital

Director of Engineering
TAO Digital, Hyderabad
June'2024 – Till Date

- **Products**: **Parts Modernization, RO Modernization, Service Modernization, Heavy Truck, CRM.**

- **Technologies**: **Java, Python, Spring Boot, Microservices Event-Driven Architecture,** ReactJs, TypeScript, AWS Cloud Services, **MCP**, **LangChain** & **LangGraph, CI/CD, Fintech, MLOps**
- **Tools**: IntelliJ , Git, Jira, Kafka, Agentic AI **Bedrock LLM, SageMaker, GitHub Copilot, Vertex AI**
- **Database**: PostgreSQL, DynamoDB, vectorDB

Roles & Responsibilities:

- Lead the **entire Portfolio** comprises **250 + FTEs** with **25 Direct Reporters**.
- Reviewed the **Product Design**, **Architectures & Code Quality.**
- **Strong Hands** on the **Java & Python for building AI Solutions and Enterprise grade product.**
- **Led** the **design and development** of **Predictive Residual Modeling Agentic AI** for Heavy Truck Vehicles & Fleet Management using **RAG, MCP, LangChain & LangGraph** frameworks**.**
- Defined and Drove **KPIs, OKRs, budget management, P&L.**
- **Led** the **QBR** process for all vendor relationships and alignment.
- Drove **Engineering Excellence**. **Hiring** Top Notch Engineers.
- Conducted **Performance Reviews**.

Key Achievements:

- **P&L** of **$50 Million**.
- Achieved **95% license renewal rate**, reflecting strong product adoption and customer satisfaction.
- Expanded client base by **40 new dealerships, including 12 large multi-location dealer groups**.
- 85% of dealerships are enabled to fully digitize their sales process, reducing manual paperwork by 70%.
- Reduced average onboarding time from 4 weeks to 2.5 weeks, accelerating go live.
- Integrated with 5 new OEM APIs, enhancing real-time vehicle availability and pricing updates.

Data Modernization & Cloud Migration| TRIANZ Digital

- **Products:** **AVRIO Data Platform (Data Products with Data Mesh), Concierto Cloud Migration**
- **Technologies:** Java, Microservices Architecture, Spring Boot, ReactJs, TypeScript, DevOps, AWS Cloud Services, ITIL & ITSM, MLOPS, **Fintech**.
- **Tools:** IntelliJ, Git, Jira, AWS, Azure, **Kafka**, **Gen AI Bedrock LLMs**, **Tableau**, QuickSight, Vertex AI
- **Database:** PostgreSQL, Redshift, DynamoDB, **vectorDB (Pinecone), MCP, LangGraph**.

Roles & Responsibilities:

-
- Led the **E2E Product delivery from Inception to Launch**.
- **Led the skilled Product managers, Backend, UI, UX & QA teams. Team size 100 + FTEs.**
- **Designed and** developed the **AVRIO** product integrated with **Copilot,** powered by **Generative AI capabilities to enhance user productivity and automation.**
- **Strong Hands** on the **Java & Python.**
- Reviewed the **Product Design**, **Architecture** & **Code**.
- ITSM (Ticketing and Incident Management).

Key Achievements:

- Enabled measurable business growth through client-focused solutions, contributing to revenue targets and client satisfaction rates above 95%
- Improved Operational Efficiency by 18%
- Enhanced Portfolio Performance. Returns increase by 24% and penetration by 9%
- Cost Reduction; Operational cost by 21% and expenses by 36%
- Enhanced Reporting and Analytics; data access reduced to 30 seconds, data availability 100%
- Improved Investor Relations.
- Streamlined Property Management; Digitized 40+ Systems
- Savings achieved to $3.7 Million.

Product Modernization & Digital Transformation E-Commerce | GAP INC

- **Technologies:** **Big Data (Azure Data Factory, Databricks, PySpark. Delta Lake, Synapse), DevOps,** Java, J2EE, Python, Microservices, Spring Boot, ReactJS, PostgreSQL, MongoDB, Redis, **Fintech**.
- **Toos:** IntelliJ Idea, Git, Jira, Azure, Heroku, Log4j, Vertex AI.
- **Strong Hands on the Java & Python** for Product Modernization & ML models for recommendation.

Director of Engineering - AI
TRIANZ Digital, Hyderabad
Aug'2022 – June'2024

Technical Delivery Head (Practice)
GAP INC, Hyderabad
Oct'2019 – May'2022

Sr. Engineering Manager
Evoke Technologies, Hyderabad
Dec'2016 – Oct'2019

Sr. Engineering Manager
Bank of America, Hyderabad
Oct'2012 – Dec'2016

Engineering Manager
ORACLE India, CSC
Mar'2004 – Sep'2012

TECHNICAL ABILITIES:

Java, Spring Boot, **Microservices**, REST APIs, API Gateway

Python, PySpark, Databricks, Data Lakehouse, ETL Pipelines

ReactJS, Angular, TypeScript, Node.js, JavaScript

C#, .NET, Go Language, UNIX, Shell Scripting, SQL

Kubernetes, Docker, Terraform, CI/CD Pipeline Optimization

Observability&Monitoring: Prometheus, Grafana, Elastic Stack (ELK)

LLM Integration &GenAI Frameworks: LangChain, **LangGraph**, llamaindex & **CrewAI, Gemini API integrations**.

CLOUD PLATFORM:

- AWS(EC2, EKS, VPC, IAM, S3, and Lambda), Azure, GCP

DATABASES:

- IBMDB2, ORACLE
- PostgreSQL
- Redshift, Snowflake
- MySQL, MSSQL
- DynamoDB, Google BigQuery
- MongoDB

DevOps:

- Azure DevSecOps
- Git, GitLab, GitHub
- Jenkins
- Docker, Kubernetes
- Nagios, Grafana, Prometheus
- JUnit
- SonarQube
- Jacoco
- Terraform

Tools:

- JIRA, ALM

Key Achievements:

- **Achieved 99.9% transaction success rate** during peak Black Friday traffic through autoscaling and API rate optimization.
- Modernized legacy e-commerce platform to microservices, reducing churn by 0.22%, improving conversion by 12%, and achieving $1.7 M in annual cost savings.
- Implemented AI-driven personalization and analytics, leading to $2.3 M revenue growth and 9% higher average order value.

Data Modernization & Cloud Migration | Evoke Technologies India Pvt. Ltd

Roles & Responsibilities:

- Managed 50 + FTEs and strategic partners.
- Handled Execution, Delivery and Business development responsibilities across multiple accounts including Java Development projects, **Big Data (Azure Databricks, Delta Lake, Synapse), ETL.**
- Product solutioning and presented Demos, PoCs.
- On-boarded 200+ applications on DevOps platform for CSC with various technologies including on cloud and on-premises for Java/Microsoft technology and developed cognitive AI ChatBot for DevOps activities.

Product Engineering| Bank of America India Pvt LTD (FinTech)

- **Products**: **Small Business, Cards, KYC, AML (Anti Money Laundering), Retail Banking.**

Technologies: **Java, Python, Spring Boot, Microservices Architecture,** ReactJs, Oracle DB.

Roles & Responsibilities:

- Managed project teams of 120 +FTEs and strategic partners across multiple tracks, sharing relevant information to establish a winning combination and addressing their training needs to suit market needs; planning and implementing IT strategies, business solutions for meeting organizational goals and growing business needs.

Citi Group, Visa, Stock Exchange, Capital Markets, Payments | CSC, ORACLE, (FinTech)

- **Products**: **KYC, AML (Anti Money Laundering), Core Banking, Cards, Data Migration.**

Technologies: **Java, Python, Spring Boot,** ReactJs, IBM DB2, Oracle DB.

Roles & Responsibilities:

- Designed and developed Java projects from inception to closure.
- Managed a team of 45+FTEs and strategic partners across multiple tracks.
- Worked for Visa cards, Cards Payments, Stock Exchange (OMS, Trade lifecycle), Investment Banking, Wealth Management & Retail Banking.

- GitHub Copilot
- Confluence
- RPA, Selenium, UFT, Puppeteer
- Kafka. Tableau, Trino

Awards & Recognitions:

- **Gold Award** for **innovation** and Patent Filed for Automation Tool

Education:

- **B. Tech (Honors)** in Electrical & Electronics Engineering from Jawaharlal National Institute of Technology (JNTU Hyderabad).
